Overall Story Line

Currently

- General intro – Data generation – Analytics

Inside analytics

- Tools – Characterization – PLE – PLP – Quality – Studies

We might:

- Process based on Strategus
- Bake in quality into process
- Bake in study steps into process
- Bake in diagnostics or new chapter
- Add big use cases (e.g. Darwin)
- Add libraries of assets (e.g. ETLs, phenotypes, studies)

Editorial Policy

- What's in each chapter?
 - How much propaganda?
 - How much manifesto?
 - How much review article?
 - How much cookbook?
 - How much tutorial?
- Supplement?
- Exercises?
- Dynamic information (e.g. current WGs)
- Style:
 - Author = we?
 - Reader = you?
 - Greek singulars
- How is audience going to read
- Overall size (currently 470 pages)
- Chapter structure
 - Rationale and value
 - Who in community
 - Cookbook
 - Further info

New Chapter Ideas

Special therapeutic areas

- Oncology
- Dentistry
- Animal
- Eye care and vision
- Perinatal and reproductive
- Psychiatry
- Rehabilitation
- Surgery and perioperative

New stakeholders

- Healthcare Systems
- Industry

New data capture

- Clinical trials
- Surveys
- Registry
- FHIR
- NLP

Special data types

- Geographic Information System
- Medical Imaging
- Medical Devices
- Cost

Methods?

Libraries?

Standard Processes?

Use Cases?
